

EMILIANO LOZA CEDILLO

SOFTWARE ENGINEER

emilianolozac@gmail.com | León, Guanajuato, México | [LinkedIn](#)

I'm a software engineer who enjoys being involved in every stage of the product, from backend architecture to frontend design. I focus on shipping things that solve real problems and adapting fast to whatever the job requires. As a self-taught professional, I'm driven by a passion for building efficient, scalable solutions and continuously sharpening my technical expertise.

PROFESSIONAL EXPERIENCE

Cloudgenia — Full Stack Engineer

Jun 2025 - Present

At [Cloudgenia](#), a technology solutions provider focused on transforming and modernizing the core technological systems of businesses, I build financial-oriented applications end-to-end and support the cloud infrastructure that keeps them running.

- Full stack development of finance-oriented applications, covering backend, frontend, and integrations.
- Design and implementation of scalable APIs and services on top of modern architectures.
- Support and maintenance of the cloud infrastructure that keeps products running in production.
- Close collaboration with the product team to translate business requirements into concrete technical solutions.

Wicode Startup — Backend Engineer

Sep 2023 - Apr 2025

Started as a backend engineer trainee and was promoted to a full-time position after completing the internship. As part of the team, I contributed to backend development in a fast-paced startup environment, delivering high-quality solutions across:

- Microservices architecture.
- Serverless backend development.
- CI/CD workflows for efficient deployment pipelines.

KEY ACHIEVEMENTS

Second place in the “VW Desafío Guanajuato 2.0”

Took part in the “Digital Communication 4.0” project, where my team and I leveraged advanced technology to solve a critical issue on the production line at Volkswagen’s Silao plant, which manufactures parts for various car models. Competing against 14 teams, we secured second place. The challenge helped me strengthen skills such as:

- Problem-solving under pressure.
- Teamwork and time management.
- Implementation of agile methodologies like Scrum for project organization and execution.

EDUCATION

Bachelor’s Degree in Technologies and Business Solutions

Aug 2020 - Jun 2024

Universidad La Salle Bajío — León, Guanajuato, México
